RITEMADE CLOSES IN ON PERFECTION

Kansas City, Kansas, USA RiteMade is investing nearly \$125,000 in new technology for its printing department. The result will be improved quality, efficiency and output.

According to Todd Whitaker, Vice President of Manufacturing for RiteMade Paper: "The addition of the new Handyscan Video Web Inspection System and the JM Heaford Wide Web Mounting System, will significantly reduce setup time, increase productivity as well as ensure the most consistent quality possible".

Steve Schwartz, President and CEO added: "This is another example of RiteMade's commitment to continuous improvement which is critical to RiteMade's and our customers' long term success. Now more than ever, it is vital that we support our customers by making the types of investments that will help them grow their sales of printed POS rolls".

RiteMade Paper is a converter of small paper rolls for business machines. RiteMade is a 100% employee owned company with manufacturing plants and full line warehouses in Kansas City, KS; Richmond, CA; and Fredericksburg, VA. RiteMade offers plain or printed carbonless, thermal, bond, Security Enhanced and 40% Post-Consumer Waste products. For detailed information please visit the RiteMade web site at www.ritemade.com
