RITEMADE TO RELOCATE WEST COAST PLANT

Kansas City, Kansas, USA RiteMade Paper Converters will be moving its manufacturing and distributing facility, currently located in Richmond, CA, to a new facility in Reno, NV in the first quarter of 2011.

Stephen Schwartz, President and CEO, explained, "While our current facility has served our company and customers well for over 40 years, economic and business conditions have changed. Having realized tremendous benefits from the move to a new facility in Kansas City, we felt the time was right to upgrade our western operations."

Todd Whitaker, Vice President of Manufacturing, added, "This new plant will not only provide more total manufacturing and warehousing space, the layout will greatly improve our operational efficiency." He also noted that he expected a smooth and seamless transition to the new location. "The move of our headquarters facility, which was a much larger and more complex project, went exceptionally well. Drawing from that experience, we're confident that this plant can be moved while maintaining the high level of service our customers have come to expect from RiteMade."

Schwartz noted that Reno was selected for the new site due to the favorable business environment in Nevada, as well as the excellent availability of high quality commercial real estate. The actual move is expected to begin in early January 2011, and to be completed before the end of the first quarter.

RiteMade Paper is a converter of small paper rolls for business machines. RiteMade is a 100% employee owned company with manufacturing plants and full line warehouses in Kansas City, KS; Richmond, CA; and Fredericksburg, VA. RiteMade offers plain or printed carbonless, thermal, bond, Security Enhanced and 40% Post-Consumer Waste products. For detailed information, please visit the RiteMade web site at www.ritemade.com
